

Investment Approach

The Income 40/60 Fund seeks to provide long-term growth of capital and income primarily through investment in a diversified portfolio of equity and fixed income securities, with a slight emphasis on bonds to help reduce volatility. The Fund generally has a mix of 60% fixed income securities and 40% equity securities. The Fund invests in a selection of underlying funds which utilize a manager-of-managers investment strategy and combine multiple specialist Portfolio Managers, each of whom is responsible for managing a portion of the portfolio in accordance with a specific mandate.
